## Join our team as Senior Manager (f/m/d) Supply Chain Logistics Processes & Systems

Full Time

📍 Heidenheim an der Brenz, Deutschland

📄 With Professional Experience 12/17/19

At **HARTMANN** you get to make a difference. Our healthcare products and solutions make an impact in millions of people's lives around the world on a daily basis – in hospitals, in clinics, and at home. We believe that health can empower people to make a positive difference in the world, and this is something worth going further for.

### Your area of responsibility:

- Development, implementation and optimization of global warehouse and transportation processes to fulfill dedicated customer requirements and enable continuous freight and logistics cost optimization
- Requirements management and business blueprint development for innovative IT solutions in the area of warehouse and transportation processes
- Bring outside knowledge & global standards in and ensure global process standardization and compliance
- Change request management with IT and countries
- In depth data analysis of process efficiency/effectiveness and deduction of recommendations/direction concerning optimization/change activities
- Business Case calculation/validation in the area of Logistics processes and systems
- Benchmarking for warehouse and transportation processes
- Project- / Workstream lead for cross functional, cross business, complex and time critical projects with regional/global scale
- Interface function to process owner ORDER and PLAN
- Management and definition of standard logistics service catalogue and according processes in alignment with process owner ORDER
- Root cause analysis and realization of CAPA for Logistics

### What we look for:

- Professional experience (min. 5 years)
- Bachelor or Master's degree in an area related to business administration and practical experience in managing Logistics (Warehouse and Transportation)
- Sound experience in the area of warehouse- and transportation processes and systems, ideally the medical industry and other industrial sectors
- Deep knowledge of SAP ERP, SAP EWM/LES, SAP BW, SAP TM, EDI and ideally further experience in one or more of the areas as Material Flow System (MFS), HSE, Quality and Customs/SAP GTS
- Ability to lead and manage change as also find solutions and take decisions
- Strong analytical skills
- Methodological competence (e.g. REFA, MTM, PDCA, DMAIC, Lean Management, Six Sigma, FMEA, etc.) with proven practical adoption in the realization of new processes as well as continuous process improvement
- Good project management skills
- Strong communication skills on the different communication levels
- Proven track record in the design, development and successful implementation of cross functional and complex projects in the logistics area
- Very good English and German language skills

### Benefits:

- Stable and continuously growing company with over 200 years of company history
- A motivated and helpful team, which is fully behind our meaningful products
- Reconciling work and family life
- Flexible working hours and attractive remuneration
- Occupational pension provision
- Comprehensive health management with massage and sports facilities
- Individual training
- Extended infrastructure (parking lot, canteen etc.)
