

ScioSense Germany GmbH

Project Buyer / Technical buyer m/f/d

Stutensee
Reutlingen

Feste Anstellung

Vollzeit

Who we are.

ScioSense is a leading technology company active in the field of sensors and semiconductors. With our history from a multinational corporation and together with financially strong shareholders, we offer smart sensors for OEM customers and for the automotive industry.

ScioSense is active worldwide in the development, production, and sale of sensors and sensor solutions. In our dynamic and rapid growing group with headquarters in Eindhoven (NL) and locations in Reutlingen (D), Stutensee (D), Pisa (I), J'nan (CHN), Shanghai (CHN), and Delaware (USA) about 130 employees work hard to support our customers in Automotive and High-Tech Industry.

In our team in **Stutensee** oder **Reutlingen** we are looking forward to your support as

Project Buyer / Technical buyer m/f/d

Your key responsibilities.

- Early involvement of procurement function in strategic important development projects as a core-team member
- Interface between engineering department, purchasing, and supplier
- Securing project relevant purchasing services throughout the development project, for example, securing the sourcing strategy in coordination with strategic purchasing, procurement of, for example, investment items and/or external services, aligning project schedules with involved suppliers
- Identifying, defining, and executing cost saving projects, also after SOP
- Preparing sourcing decision proposals
- Being responsible for RFQs of project specific needs
- Order processing of technical complex demands, for example, engineering outsourcing, high value technical items
- Supporting negotiation and creation of contractual frameworks, for example, NDA and SOW

Your qualifications.

- Bachelor of Engineering in either electronics, electrical engineering, semiconductor technology, or another relevant technical field
- Sound experience in purchasing of technical items
- A few years of work experience as project buyer
- Basic knowledge of semiconductor IC design, manufacturing, and testing process
- Distinct knowledge of product development processes and project management
- General broad technical understanding, a distinct commercial understanding, and negotiation skills
- Basic knowledge of SAP, especially requisitioning processing, and order creation
- Very good proficiency in German and English
- Excellent skills in team collaboration, communication, problem-solving, and self-organisation
- Interest to work in both IC design and procurement environment
- MS Office knowledge is a must

Why work at ScioSense?

We are an innovative, rapidly growing market leader in the field of environmental sensors. Our employees participate actively with their creative ideas to this exciting and international work environment. In addition to an attractive salary and flexible working hours, we offer:

- Open corporate culture: flat hierarchies, short communication channels, and an open-door policy
- Working on the technology of tomorrow for innovative international customers in the automotive and consumer goods sectors
- Mutual helpfulness, warm and open dealings with each other, and celebrating successes together
- The opportunity to start the weekend on Friday afternoon thanks to flexitime
